

CONTEXT

# STRONG & INCISIVE. IDENTITY & CHARACTER.

## COSMETIC OVERVIEW

Azha cosmetic collection is formulated with gentle ingredients and botanical extracts, such as Alfalfa and Mallow organic extract, Echinacea, Verbena and Watercress extracts. The body cream is enriched with Vitamin E and Shea butter, the conditioner is enriched with purified keratin and Chamomile extract. Discover the full body and bath collection made in Italy, clinically tested, without mineral oils or phenoxyethanol.

## AUTHENTIC DESIGN AND SMART ENGINEERING.

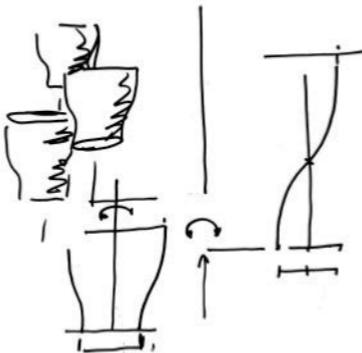

**Azha** cosmetic collection stands out due to its new dispenser solution which is the result of a fruitful design collaboration between Palomba Serafini studio and Gf's design department. The creation is a perfect balance of elegant design and outstanding functionality. *The aim of the project is to offer an extremely aesthetic solution, flexible in its configurations and consistent with Gf's philosophy that is increasingly attentive to the issues of environmental sustainability and the circular economy.*

EXCLUSIVELY  
DESIGNED FOR GFL BY

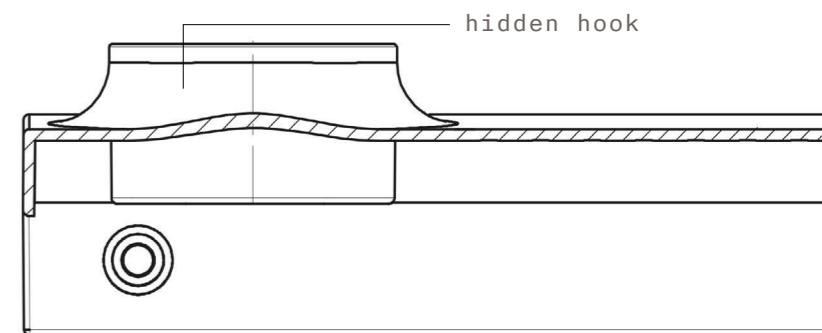

ps+a

Ludovica + roberto palomba

## ELEGANCE AND SUSTAINABILITY

Conceived to be an iconic piece of furniture, the Azha “shelf system” consists of two simple elements that hide the technical components of safety and functionality inside. The recycled ABS shelf is an interesting novelty both due to its functionality and the use of materials. The bottle, made of recycled plastic (92%) and 100% recyclable, is extremely ergonomic, safe and versatile.

recycled ABS  
100% recyclable

## DESIGNED FOR USE

In addition to being an elegant dispenser, the shelf, in its long version, is designed to offer an additional support surface for personal objects.

Each creation is the result of coherent research, developing from an interaction of thoughts, inspirations and intuitions. Refusing any linear approach as well as all aesthetic and formal stylisms, Palomba and Serafini rediscover what being a designer means, thinking about the objects' function before designing their shape.
