

LUXURY HYGIENE SOLUTIONS

easyBag

EasyBag

Bulkysoft EasyBag solutions feature a second layer of packaging in recyclable plastic. This exceptionally practical feature is designed to improve access to the products stored within, optimise transport and facilitate handling and storage.

Thanks to their particularly small, compact size, EasyBag solutions help to reduce transport costs, CO2 emissions, and all the benefits that brings.

Transport

EasyBag makes it possible to reduce transport and logistics, by up to 30%, compared with conventional packaging for the same products. The unique features of the packaging system unlock the door to reductions in both the financial and environmental impact, throughout the distribution supply chain.

Space saving

EasyBag allows for an improvement in storage costs by reducing the amount of space occupied in warehouses across the distribution network and in the storage facilities of individual end clients. The compact size of the EasyBag solution means that double the quantity of products can be stored in the same amount of space when compared conventional packaging. Additionally the fact that the packaging is flexible and not rigid means that the overall amount of space taken up reduces as the product inside it is used.

Use and handling

EasyBag is waterproof and strong. It protects the products stored inside from any external contamination and damage caused by pressure from the weight of other products. It is equipped with an easy-open mechanism, which means the packaging can be opened in two simple steps. A practical handle ensures that any staff member can easily move two packages at a time rather than one.

EASYBAG PACKAGING

- ✓ **PRATICAL HANDLE** – Easy to transport
- ✓ **EASY OPENING** – Simple to open
- ✓ **BULKYSOFT BRAND** – Guarantee of quality
- ✓ **SPACE SAVING** – Maximum autonomy, minimum space
- ✓ **COMPACT SIZE** – Reduced transport costs and CO2 emissions
- ✓ **CERTIFICATIONS** – Ultra-low environmental impact products
- ✓ **WIDE RANGE** – Over 20 products in the range compatible with EasyBag
